

# Quarterly Preventative Maintenance F662-F552 Shortening Filter INSTRUCTION SHEET

**TOOL(S) NEEDED**

- Phillips Screwdriver

**INSTRUCTIONS:**

PERFORM ALL OF THE FOLLOWING PROCEDURES QUARTERLY:

**IMPORTANT:** These instructions are for a quarterly inspection only. Daily cleaning procedures must be followed as described in the Use and Care Manual.

1. Perform daily cleaning procedures as outlined in the Filter Use and Care Manual.
2. Inspect all hoses for leaks or other signs of wear.
3. Inspect wheels for signs of wear and make sure all nuts and bolts are secure.
4. Inspect O-rings on hose nozzles. There should be one o-ring on each nozzle.

**DANGER:** shortening filter should be disconnected from power supply when performing the following steps:

1. Inspect power cord for loose or frayed connections.
2. Open top panel – inspect wiring for loose connections, burnt wires, etc.
3. Inspect inside of motor housing for signs of leaking shortening. Particularly check around the pump/motor connection and the pump lines.
4. Make sure all pump line (tubing) connections are tight and secure.
